Material Colours

HDPE Plastics:

- Lime Green
- Light Green
- Dark Green
- Green/White/Green
- Lime/Black/Lime
- Mid Grey

Powdercoat:

- Leaf Green
- Hawthorn Green
- Gloss White

Posts:

- Knotty Pine

Roto-Mould Plastics:

- Light Green
- Dark Green
- Lime Green
- Grey

Ropes:

- Black

Timber:

- Light

SLIDE

Sliding is fun, exhilarating and educational. Sliding teaches kids about their position in space by using proprioception, or the awareness of where each body part is at any given moment.

CONCEPT ONLY - DESIGN YET TO BE FINALISED

Cast Slide

- Roto Moulded Plastic
- Powder Coated Aluminum Brackets
- Stainless Steel Fasteners

Tube Slide

- Roto Moulded Plastic
- Powder Coated Aluminum Brackets
- Stainless Steel Fasteners

Step Ladder

- Roto Moulded Plastic
- Powder Coated Aluminum Brackets
- Stainless Steel Fasteners
- Anodized Aluminium

CLIMB

Climbing involves dexterity balance and cross-coordination between arms and legs on a vertical or inclined surface. Children learn to deal with height and space.

Posts

- Australian Made Custom Extrusion Powdercoated Aluminum

Plastic Climbing Wall

- Powder Coated Aluminium
- 16mm Woven Nylon Rope
- Plastic & Aluminum Rope Fittings
- Stainless Steel Fasteners
- UV Stable HDPE

Platforms

- UV Stable HDPE
- Powder Coated Aluminum Frame
- Stainless Steel Fasteners

SWING

Swinging helps kids develop fine motor skills - grip strength, hand and arm coordination, core muscles and balance. And swinging is fun!

- 2 Bay Swing with Roto Basket**
- UV Stable HDPE
- Powder Coated Marine Grade Aluminum
- Stainless Steel Fasteners
- Roto Moulded Plastic
- Aluminum Reinforced Rubber Seats
- 16mm Woven Nylon Rope
- Stainless Steel Swing Chains
- Stainless Steel Swing Hangers

FSM-0027 - All Abilities Spinner

- UV Stable HDPE
- Powder Coated Marine Grade Aluminum
- Stainless Steel Fasteners
- Powder Coated 304 Stainless Steel

IMAGINATION

Playing pretend is key to child development, because it helps kids build critical decision-making, cognitive and social skills.

CONCEPT ONLY - DESIGN YET TO BE FINALISED

- LT-107 - Play Fort
- UV Stable HDPE
- Powder Coated Marine Grade Aluminum
- Stainless Steel Fasteners
- Roto Moulded Plastic

CRAWL

Tunnels are a great way to develop gross motor skills and teach children to control their arms and legs. Tunnels can also be used as a quiet place for children to self-regulate their emotions, returning to play when they feel ready.

CONCEPT ONLY - DESIGN YET TO BE FINALISED

BALANCE

Balance activities are important to the development of a child's upper body, core and lower extremity muscles. They help children develop strong posture, coordination, balance and gross motor skills.
